

Division of Interest

BOLO

P2's BOLO Division of Interest module is a stand-alone program that interfaces with the BOLO system to create division orders for wells and units. The DOI module expedites the creation of division orders by using BOLO owner interests and a Microsoft® Word form template.

The DOI module generates division orders, transfer orders, and multiwell division orders that can be printed and mailed to owners. Options are provided at the point of form generation that allows users to customize the output for mailing.

The standard NADOA form (Microsoft® Word template) is used and can be customized to include company logo, address, preferred font and instructions language. Options include generating exhibit A's as attachments to the division order form with owner interests, or no exhibit A with one owner per division order.

Division order owners and interests are obtained from the BOLO master deck or revenue deck for specified wells or units. Transfer orders can also be generated using the BOLO ownership change authorization to fill in the assignor and assignee interests on the transfer order form template.

Benefits

- Provides customizable templates to include company logo, address, preferred fonts, etc.
- Includes several options for creating the division order — one per owner, master copy only, full sets with exhibits and fractional interests.

Features

- Captures BOLO Revenue (RV1230) and/or Master Deck (LD1280) or OGP (OGP1230) ownership to build division orders.
- Uses Microsoft® Word templates as division order & transfer order models.
- Uses Property Maintenance (PRD1210 & OGP1210) to print well information.

The easy-to-use DOI module generates division orders, transfer orders and multiwell division orders that can be printed and mailed to owners.
