

THE MARKET LEADER IN PRODUCTION SOFTWARE FOR UPSTREAM OIL AND GAS PROFESSIONALS

P2 Merrick is an end-to-end production solution that helps oil and gas companies monitor and improve production operations and results through the effective collection, accounting, and reporting of accurate and validated production data. P2 Merrick is optimized for all types of operations - onshore/offshore and conventional/unconventional.

IMPROVED EFFICIENCIES

- Clearly defined process flows
- Field data capture in one central repository
- Proven integration points

GREATER VALUE

- Reduced downtime and deferrals
- Complete production automation
- Full management of well performance

Key Product Facts

- 1 P2 Merrick manages over 500,000 wells nationwide (more than half in the U.S.).
- 2 P2 Merrick embodies the industry standard in production software with nearly 30 years of market experience.
- 3 P2 Merrick is the leader in mobile field operations solutions used by more than 22,000 field operators.
- 4 P2 Merrick is used by top 10 operators in every major shale play.

Benefits

REPLACES spreadsheets and manual, error-prone processes with best-in-class software that boasts an intuitive UI built for growth-oriented customers

ELIMINATES disparate systems, and ensures accurate and up-to-date production data for every well

ENSURES accurate hydrocarbon allocations that drive revenue payments and royalty distributions

REDUCES unplanned downtime through preventative maintenance and optimizing well production

INTEGRATES field operations, production data management, operational intelligence, and forecasting

AUTOMATES time-consuming production practices enabling staff to be more efficient

STREAMLINES cross-department communication allowing for faster exchange of data and information

Features

- Configurable software that can be implemented in as little as three months
- Available as a cloud-based or on-premise solution
- Integration with most third-party systems/applications
- Automated data capture
- Pre-configured production workflows
- Ability to easily generate reports to analyze data
- Active and supportive user community
- Easy to learn (intuitive navigation and logical structure)
- Scalable to manage and support 10 to tens of thousands of properties
- The industry standard in field data capture and operations solutions

Integrations & Modules

Combine these with P2 Merrick for increased functionality and an enhanced user experience.

P2 Field Operator – A mobile field operations solution designed for today's upstream oil and gas environment. The solution combines seamless data capture, measurement validation integrated with SCADA and other data sources and combined with a sophisticated Route Surveillance engine which enables operators to pump by exception with task management, run ticket imaging, and collaboration across disciplines and departments.

P2 eVIN – A field data capture solution used for data entry, standard industry measurement calculations and other data processing, data verification and validation from all entry sources, and operational scheduling with alerts.

P2 ProCount – A hydrocarbon accounting solution that provides flexibility and reliable accuracy for simple to complex allocation systems with multi-tier relationships between wells, tanks, meters, and other equipment.

P2 Carte – A reporting and analytics solution that enables customers to visualize, graph, and analyze production data by a single well, field, or across all assets.
