Enable Self-Service Reporting Across Your Business

P2 Reporting brings your data together in one place, giving you the ability to perform self-service reporting and gain instant insights by drilling down into the most granular of data. With this solution, you can make quick business decisions backed by accurate and timely data.

Self-Service Insights

No more waiting on application users or an IT department to create a report or dashboard. Anyone in your company can create a report or dashboard via drag and drop, slice and dice the data, add a detailed chart, and then publish to a group or export to PDF / Excel.

Everything You Need In One Package

Data connectors, a metadata editor, and the visualization tool all come included, giving you a one-stop shop for all of your reporting needs. With the metadata editor, easily join data sources to get reporting and dashboards across your disparate data sources.

Uncover Key Insights

Some of the most valuable insights fall between the cracks because of disparate systems and teams. By integrating your application data, P2 Reporting gives you access to insights that have never been accessible before.

AD HOC ANALYSIS & EXPLORATION
General Users

DRILL-DOWN, GRAPHS & TRENDS
Reporting Users

STANDARD FORMAT
Regulatory, Financial Reporting, Business Reports

DASHBOARDS
Executives & Management

www.p2energysolutions.com
Monitor Business Health
Often-used reports and dashboards can be scheduled and emailed automatically in the chosen format.

Flexible Deployment
P2 Reporting is available in the P2 Cloud or on your premise.

Perform Calculations On The Fly
Create calculated measures and attributes for use in a single report or across a domain.

Manage By Exception
Conditional flagging of exceptions can be configured to meet your specific business requirements.

Empower Your Teams Through Ad-Hoc Data Exploration
Any of your employees can create a self-service report via simple drag and drop. Users select the intuitive attributes and visualization type they want – crosstab, table, or chart – and then can format the report before sharing.

Gain Immediate Insights Using Dashboards
Ad-hoc reports can be combined into a dashboard and published. External information, available via a URL, can be added to a dashboard for a contextually-aware experience.

Powerful Pixel Perfect For Regulatory, Financial, And Corporate Reporting
A powerful, pixel-perfect reporting solution is included in P2 Reporting, giving you the necessary tools for your formal financial and regulatory reports.

A Trusted Solution
The underlying technology of P2 Reporting is used in more than 140,000 production deployments and by more than 2,000 commercial customers.

Implementation Is Quick And Easy
P2 installs and sets up the solution. A little training is all you need to become an ad-hoc reporting whiz.
