P2 Workflow for End-Users | Level: Basic, new user | Duration: Two 2hr sessions

This course provides the initial new-user training for P2 Workflow and is the prerequisite class for all other P2 Workflow training. The End-Users class focuses on how to build out a workflow process using P2 Workflow. This class covers modeling a process, building a form, introducing triggers, managing users, designing an output document, creating assignment rules and email notifications, and executing a workflow.

Course Objectives

- Navigate the P2 Workflow user interface
- Model a process
- Create variables
- Build a form
- Create Triggers
- Design an output document
- Create assignment rules and email notifications
- Execute a workflow end to end

P2 Workflow Technical Training | Level: Advanced, for IT professionals | Duration: 8 hrs

P2 Workflow is a solution that allows users to bring in Business Process Management for Oil and Gas applications. This application is web based, allowing connections to multiple data sources. In this class we will cover how to connect not only to P2 Applications, but to any application using either a REST API or a Database Connection.

We also provide more detail on configuring Advanced Gateways, such as Inclusive and Parallel, as well as Process Supervisor Roles and

This advanced level course is ideal for users such as IT Professionals who work on the technical side of the Oil and Gas Industry and want to create custom triggers to connect to P2 Applications or third-party solutions.

Pre-requisite: We recommend that the user take the P2 Workflow for End-Users class or the P2 Workflow Fast Track to understand the basic foundations of P2 Workflow.

Objectives:

With successful completion of this class, you will be able to:

- Rest Services Overview
 - Configure URL Connection
 - Write and Configure a PHP trigger
 - Execute GET trigger
- Database Connection
 - Configure Database Connection
 - Execute Queries
 - Dependent Fields based on field selection
- Connection to P2 Reporting
 - Configure a Report to run through P2 Reporting REST API
 - Upload Report to P2 Workflow
- Gateways
 - Understand an overview of Parallel Gateways
 - Understand an overview of Inclusive Gateways and Configuration
- Event Management
 - Connect to P2 Workflow REST API Service
 - Start Case via REST API of P2 Workflow
- Process Supervisor
 - Understand an Overview and Roles
