

# P2<sup>®</sup> Qbyte CS Land

## THE MOST SOUGHT AFTER LAND MANAGEMENT SOFTWARE BY CANADIAN OIL AND GAS COMPANIES OF ALL SIZES

Qbyte CS Land is a land management system for all your industry contracts, leases and assets and is used by more than 230 companies, including 75 of Canada's top 100 producers.

### GUARANTEED EFFICIENCIES

With a familiar, intuitive interface already widely known in industry, companies are saving valuable administrative time; plenty of knowledgeable resources to choose from

Gain faster access to land asset information through powerful & flexible Qbyte Optix reporting

Qbyte 360 — built-in integration, interfaces, cross-application data comparisons & reporting

### GREATER VALUE

Power of P2 — singular focus on building software for the upstream oil & gas industry

Secure web-based application with SaaS model pricing that alleviates IT, hardware, & upgrade fees

Commitment to solid software development methodologies; strong support structure

Qbyte Exchange for acquisitions, divestitures, & bulk data updates

## Key Product Facts

1

Most widely used Land Management software in Canada.

2

Whatever your company's size, whatever its plans, Qbyte CS Land fits.

3

Industry standard and ad-hoc reporting available through Qbyte Optix.

## Benefits

**SECURELY** manage land assets in the cloud allowing 24/7 access to your data from anywhere in the world

**REALIZE** your data's potential with powerful, easy-to-use web-based reporting. Qbyte Optix offers greater flexibility for accessing the data you need, your way; save, schedule, email and even share your reports

**MAXIMIZE** your revenue potential by using the Third Party module, combined with Utility updates accessing public data to help to ensure you're getting all of your Road Use revenue

**ENSURE** top rated application support through live, local helpdesk interactions and ongoing, no charge customer training initiatives

**FLEXIBILITY** with optional **Qbyte Exchange** spreadsheet module for mass loading (think acquisitions!) or updating on mass your valuable land records

**REDUCE** property acquisition costs when you are using the same land software as most other companies — you never know what the future may bring
