

# P2 Reporting

## P2 REPORTING UNITES THE DATA ACROSS ALL OF YOUR P2 SOLUTIONS, ENABLING SEAMLESS INTEGRATED REPORTING AND ANALYSIS WITH A POWERFUL, IN-MEMORY ENGINE

The solution is flexible, as it's able to connect to a myriad of data sources and then output analysis to PDF, XLS, PPT, and more. Using the same technology trusted by millions of users across thousands of companies, P2 Reporting is enterprise ready.

### IMPROVED EFFICIENCIES

Dive deeper into your OPEX data with curated LOS reporting

Compare production data against ongoing operating expenses and revenue

### GREATER VALUE

Monitor your spend on vendors across your enterprise

Understand your capital spend with AFE reporting

## Key Product Facts

1

P2 Reporting possesses 150+ different dashboards, charts, reports, and other visualizations, plus the ability to create user-driven, ad-hoc views.

2

P2 Reporting is a trusted solution used in more than 140,000 production deployments and by more than 70 upstream oil and gas companies.

3

P2 Reporting features an out-of-the-box reporting library including the LOS that lets users drill down for sophisticated analysis.

4

P2 Reporting allows for the deep analysis of well performance and well profitability.

## Benefits

**ENABLES** intuitive, ad-hoc data discovery, report creation, publishing of dashboards, and pixel-perfect reporting in one solution

**CONNECTS** data sources to get reporting and dashboards across disparate tools and systems allowing you to uncover key insights

**ALLOWS** employees to create self-service reports via simple drag and drop

**EMPOWERS** your team through ad-hoc data exploration

**PROVIDES** immediate insights through customizable dashboards

**CREATES** calculated measures and attributes for use in a single report or across a domain

## Features

- LOS Reporting – dive deeper into your OPEX data using the ad-hoc reporting engine
- Create dashboards to keep an eye on vendors or monitor your own spend across your enterprise
- Understand your capital spend with the flexibility to analyze your projects retrospectively
- Production Reporting – compare your production data against the company’s ongoing operating expenses and revenue
- Land Reporting – print a formal division order or transfer order, create acreage analysis, and more
- Drag and drop your favorite charts, tables, and reports to create a dashboard
- Pixel Perfect Studio – for formal regulatory, financial, and operational reporting, Studio will get the format right
- Report Scheduling – allows reports and dashboards to be scheduled on a regular basis or when an event occurs
- Mobile Access – with an Apple or Android device, anyone can access their reports and dashboards while on the go
