

P2 Shift Log

INDUSTRY LEADING ELECTRONIC LOG AND SHIFT HANDOVER SOLUTION

P2 Shift Log is a comprehensive operations collaboration environment used to capture, manage, handover and communicate mission critical information.

IMPROVED EFFICIENCIES

Integrated workflows for content sharing & task management

Increased operational performance insight

Simple & efficient forms data entry with integration into source systems to avoid double handling

GREATER VALUE

Seamless shift handover & handover reporting process

Integrated into other engineering & operations management processes

Self-service configuration; flexible, scalable, & auditable

Information captured during a shift forms the foundation for operational decision making. These decisions have a direct impact on production optimization and plant safety. P2 Shift Log provides a consistent structure around this information and enables real-time visibility of operating conditions. This allows the early identification, assignment, and resolution of issues, which reduces unplanned downtime and improves operational efficiencies.

Benefits

REPLACES paper-based log books, spreadsheets and manual, error-prone processes with best-in-class technology

STREAMLINES and structures the capture of shift information

CONNECTS field and office users enabling collaboration and more informed decisions to be made

PROVIDES critical safety elements to business operations and improves regulatory and corporate compliance

REDUCES unplanned downtime and prevents hazardous incidents through the early identification of issues

INTEGRATES existing systems including SCADA to provide real-time and situational awareness performance against KPIs

ENSURES better understanding of operational performance against KPIs

Key Product Facts

- 1 P2 Shift Log has been transforming shift logging and the shift handover process for over 15 years.
- 2 P2 Shift Log is used by multinational companies of all sizes across the globe.
- 3 P2 Shift Log enables production optimization and plant safety.

Features

- Structured and comprehensive handover reports
- Configurable forms providing the ability to document shift activities, commentary and forms
- Built-in dashboard and analytics capabilities through an accessible web-based user interface
- Track and assign actionable items
- Work instructions
- Efficient searching through log entry data
- Role-based security
- Full audit trail of all changes
- End of shift publishing of the Logbook
- Comment and discuss log entries

“P2 Shift Log enables the early identification, assignment, and resolution of issues, which reduces unplanned downtime and improves operational efficiencies.”

An Industry Tradition

P2 Shift Log was created by the same team that developed P2 Explorer, an industry-leading production solution delivering visualizations and diagnostics and trusted by resource companies around the world for over 20 years.
